Letter of Intent

Dear Members of the scholarship committee, I am writing this letter to express my situation for availing of the scholarship for my undergraduate studies. Each time I plan on deciding if to apply for University studies the factor that pulls me back is the affordability of the undergraduate studies. I experienced childhood in a working-class family in Bangladesh and my parents have always upheld me and my siblings during schooling. They were resolved to give us education, which was not effectively open to them because of the difficult circumstances. Thanks to my assurance, hard work, and their help I have graduated from high school as outstanding amongst other students in the class. Even so, doing undergraduate studies abroad is not reasonable for my family. My father was a farmer because he was not able to work after his brain surgery and my mother is working as an Assistant Teacher in a semi-government institute. In this condition without this scholarship, my dream of studying in a prestigious university in Turkey will remain a dream. My parents and family are not in the position to fund my studies, because most of our family income covers only the care and medicines for my father and food costs. I am doing a tuition job for several years; get the scholarship through which I will get an opportunity to study is a clear street to my future career and achievement of my life goals. It will give me the freedom to study without stress about the future financial burden and relieving my parents. Turkey is the second country in the world in access to higher education. Turkey involved in the European higher education area is implementing the process in a perfect way. In this country where countless civilizations have been hosted, everyone is tolerant and respectful to each other. Turkey is a safe and peaceful environment for Muslims. With at least one university in every city, Turkey is exactly a student-friendly country; social clubs; sports teams, and cultural events at every university bring together students and make distant geographies close. The hospitality of Turkish people has been legendary all over the world. Life in Turkey is more reasonable than in most countries; wherever I go to visit easily get halal food, drink, and entertainment as a Muslim I prefer. Actually, I fall in love with Turkish culture, environment as well as Islamic culture. As a Muslim, if I get the chance to study there I will be happy to fulfill my dream. In the end, I would like to point out that I am determined to make the most out of the scholarship program. I believe that being a student in a prestigious University would not only empower my career development but would give me the tools to utilize my full potentials. I am grateful for considering my application and I look forward to a favorable reply.

In this section, it is expected to explain following details: your academic and social experiences relating the field you want to take an education, your reasons for choosing Turkey for study and the importance of your future plans for your education and scholarship in Turkey. You can write the letter of intent in the language you can express yourself.

At the age of 2021, we belong to a generation of massive technological advancements where distance is no longer a factor for disruption in monitoring from a remote location. However, monitoring the mind of a human through technology is yet being improved over time. The industrial revolution 5.0 is taking us towards the internet of everything. With the blessings of artificial intelligence, the internet of things, genetic engineering, and robotics we are heading towards a generation where the technology can possibly understand the software, the hardware. I have passionate about engineering such as computer science, computer engineering, artificial intelligence, and so on after completing my graduation, I will deploy my study in my country as well as a whole over the world. IT person can work remotely and can help people, society, even if mass people will be benefited by my knowledge. In Bangladesh, there are a lot of people who live here every year more than 1 million people being graduated but there are unemployed due to unskilled so I want to do something for my country after earning my engineering degree as well I will work for poor people in my country and whole over the world. In the future, I will establish a software engineering training institute with a software Development Company. My training institute will teach whole over the world without high payment. Now we are living in one country on the Internet. If we have an internet connection no country barrier all are connected to each other. So I hope that my

intention of study will be helpful worldwide for people and society.

If you have a subject in your application documents that you think is not clear enough and you want to explain, or if you want to draw the attention of the evaluation committee, please briefly explain in this section. You can write the description in the language you can express yourself.

Field Questions

Family Information **Total Monthly Income : 250-500 (\$)**

DITHI SULTANA / Yes

Mother's Name / Is your mother alive?

Shahid Ashad Collegiate Girl's
High School and College
